

2018 CERP Training and Certification

CERTIFIED ENTERPRISE RESILIENCY PRACTITIONER (CERP)

The CERP training and certification focuses on establishing and maintaining enterprise resiliency. This class will show attendees how build resiliency into their organizational model. The concepts and techniques learned in this class will help students build resilient departments, functional organizations, business units and even enterprise organizations! After learning the steps to resiliency, attendees will be able to assist their organizations in remaining buoyant in adverse circumstances through adapting, surviving and prospering under any and all conditions.

APRIL 24-25, 2018 Independence, OH (examination voucher included with this class)

CERP OBJECTIVES

- * To provide the knowledge an individual can leverage to enable his/her department/company/enterprise to establish resilient practices and resiliency techniques.
- * To build a functional and cohesive team which is the foundation for a resilient environment.
- * To grant a certification to those individuals that have demonstrated resiliency concepts by successfully completing the CERP examination.
- * To develop and share a library of knowledge that certified individuals can use to support and advance their business resiliency efforts.
